

Shobhit Jajoo

Software Engineer | B.Tech Computer Science | VIT Chennai

Chennai, Tamil Nadu

jajooshobhit@gmail.com

+91 8955726633

EDUCATION

Class XII

92% • 2024

Class X

93.5% • 2022

TECHNICAL SKILLS

LANGUAGES

Python, C, C++, Kotlin

WEB DEVELOPMENT

HTML, CSS, JavaScript, React

DATABASES

SQL, MongoDB

TOOLS & CONCEPTS

Git, REST APIs, Data Structures & Algorithms, Android Development

LANGUAGES

English

Fluent

Hindi

Native

PROFILE

Third-year B.Tech Computer Science student at VIT Chennai with strong academic performance (CGPA 9.1) and a focus on building efficient, real-world software systems. Hands-on experience developing applications in C++, Python, and Kotlin across mobile, web, and systems domains. Passionate about clean code, problem-solving, and growing as a software engineer through practical development work.

EDUCATION

Bachelor of Technology — Computer Science

Vellore Institute of Technology, Chennai

CGPA: 9.1 / 10 • Expected Graduation: 2028

PROJECTS

Cinema Movie Display Application

Mobile App

- Integrated **TMDB API** to fetch real-time movie data including posters, ratings, trailers, and show details.
- Displays currently running and upcoming movies with search, filters, and detailed views.
- Implemented optimized API calls and image caching for fast loading and seamless UX.
- Achieved **40%** faster load time and **30%** reduction in data usage.

Search Engine Optimization Tool

C++

- Built a C++ search engine with inverted index and ranked query retrieval.
- Indexed **1,000+** documents and handles **1,000+** search queries with low latency.
- Implemented efficient indexing, tokenization, and ranking mechanisms.
- Reduced average query response time by **35%** using optimized data structures.

Healthcare Workforce Optimization Engine

C++

- Developed a healthcare staff scheduling engine considering availability, workload, certifications, and role requirements.
- Reduced manual assignment time by **60%** through automated optimization.
- Supports scheduling for **500+** patients and **200+** healthcare staff.
- Uses a custom priority-aware scheduling algorithm to minimize conflicts and ensure balanced workload distribution.

Music Control App

Kotlin • Android

- Developed an Android music player with playback, pause, next/previous controls, and playlist management.
- Implemented background playback using Foreground Service for uninterrupted music.
- Persisted playback state and playlist data for seamless user experience.
- Optimized activity lifecycle and media session handling for better performance.

CERTIFICATES & COURSEWORK

HackerRank

SQL (Intermediate)
Verified Achievement

HackerRank

Problem Solving (Basic)
Verified Achievement

Data Structures & Algorithms

Code Help — Completed

CODING PROFILES

LeetCode — 100+ problems solved across arrays, strings, trees, stacks, and dynamic programming; focused on time and space optimization.

GitHub — Active repositories covering C++, Python, and Android (Kotlin) projects with clean commit history.

HackerRank — Certified in SQL and Problem Solving. Regular practice in algorithms and data structures.

Portfolio — Personal site (shobhitjajoo.in) showcasing selected work and contact details.

ACTIVITIES

Member — Newton School of Coding Club

Active member participating in coding sessions, peer learning, and collaborative development.
